

## ROCK-HARDENED™ Armoured Fibreglass Traffic Signs

Typical aluminum traffic sign vandal damage caused by swinging from the sign – often occurs where students gather.

**The Solution:** ROCK-HARDENED™ armoured fibreglass traffic signs ready for decals

The new **ROCK-HARDENED** armoured fibreglass traffic sign will prevent all this.

- How many of your traffic signs have been damaged by someone swinging from one of your signs until it is bent completely out of shape?
- How many of these were you able to repair?
- How many were you unable to repair?
- How many were complete write-offs?

Anything short of a blow from a snowplow blade or gunfire, will not damage the **ROCK-HARDENED** fibreglass traffic sign.

**ROCK-HARDENED** armoured fibreglass traffic signs will save thousands in replacement costs caused by vandals.

At this time the **ROCK-HARDENED**™ option is available only on sign sizes of 30cm x 30cm and 60cm x 60cm

**SIGN-MARK-SIGN**® fibreglass traffic signs. **NO PARKING** and **STOP** signs are included:
