

TooTough™ Anti-Graffiti Fibreglass Traffic Signs

TooTough™ Anti-Graffiti Fibreglass Traffic Signs are created by adding a clear non-stick Teflon-like covering to the finished sign face during the preparation process.

We all know the answers to the following questions:

- How many of our traffic signs been damaged by graffiti, stickers, paint, Magic-Marker?
- How many of these were we able to repair?
- How many were we unable to repair?
- How many were complete write-offs?

A quick wipe with a dry rag instantly removes stickers, paint, and Magic-Marker from a **TooTough™** treated surface.

Note, this non-THI sign riveted to a reinforced back to keep it flat. The new **TooTough™** anti-graffiti fibreglass traffic sign will prevent these expensive work arounds.

We know the impact on people and the environment caused by chemical cleaning compounds. It is a proven fact, the better they work, the nastier they are.

With the **TooTough™** anti-graffiti fibreglass traffic sign treatment, all this is eliminated.

TooTough™ will save graffiti removal labour costs and expensive chemical costs.

At this time the **TooTough™** option is available only on 30cm x 30cm and 60cm x 60cm SIGN-MARK-SIGN © fibreglass traffic signs. **NO PARKING** and **STOP** signs are included.

PRICING:

- 30cm x 30cm: **TooTough™** anti-graffiti fibreglass sign priced at an additional cost of \$ 11.25
- 60cm x 60cm: **TooTough™** anti-graffiti fibreglass sign priced at an additional cost of \$ 22.50

NOTE: High Intensity available on all **TooTough™** anti-graffiti fibreglass traffic signs.
